Steel Fixing Nails, ⅞″ .. **7d.** lb. **Galvanised Fixing Nails,** ⅞″ .. **9d.** lb

Free of Sales Tax.

WUNDERLICH ART METAL CEILINGS

DESIGN RATES.

The following Design Rates for complete steel ceiling treatments, illustrated in our Catalogue (M-81), will enable clients to calculate readily the total price for similar designs in rooms of any size. It will be noticed that we quote a rate per square yard for the ceiling, exclusive of cornice, and an extra price per lineal foot for the cornice; so permitting our clients to reckon out the alteration in price if a cornice other than that illustrated is desired. The rates per square yard of ceilings, and per lineal foot of cornice, hold good for ceilings of ANY AREA. These Design Rates cover the Wunderlich Steel Ceiling Material necessary, including sufficient $\frac{7}{8}$in. x 16 gauge nails for fixing the metal, and ample material to provide for the waste that is at times involved.

In addition, we supply a working drawing, showing the correct arrangement of the various patterns in the room to be ceiled. When ordering clients should furnish a rough plan of the room to be ceiled, showing the direction in which the ceiling joists run.

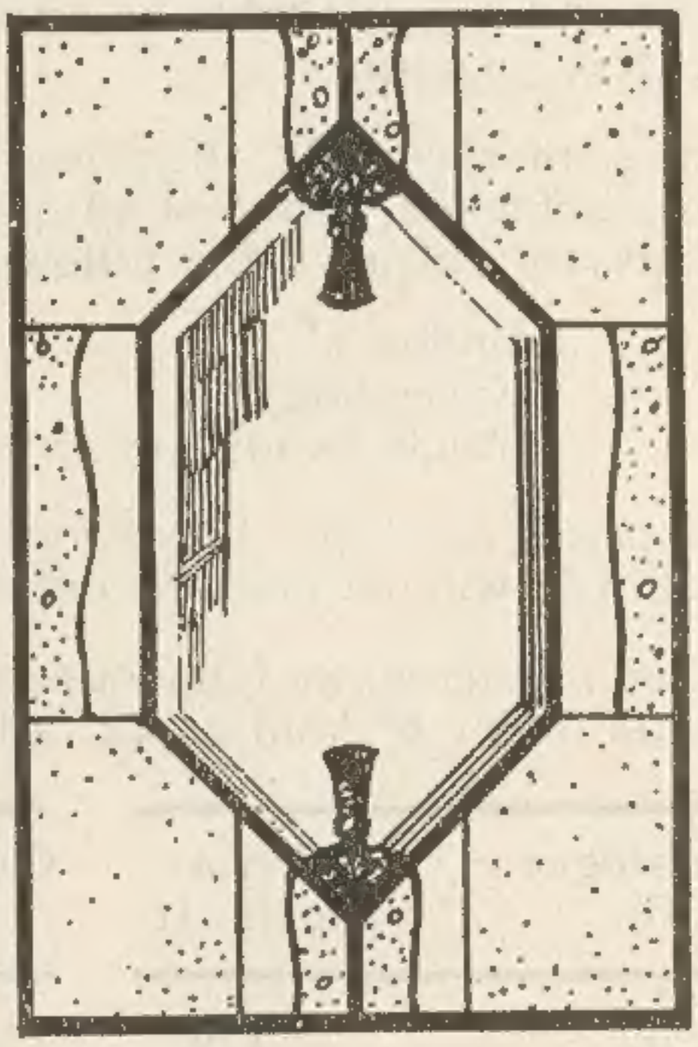
WUNDERGLAZE

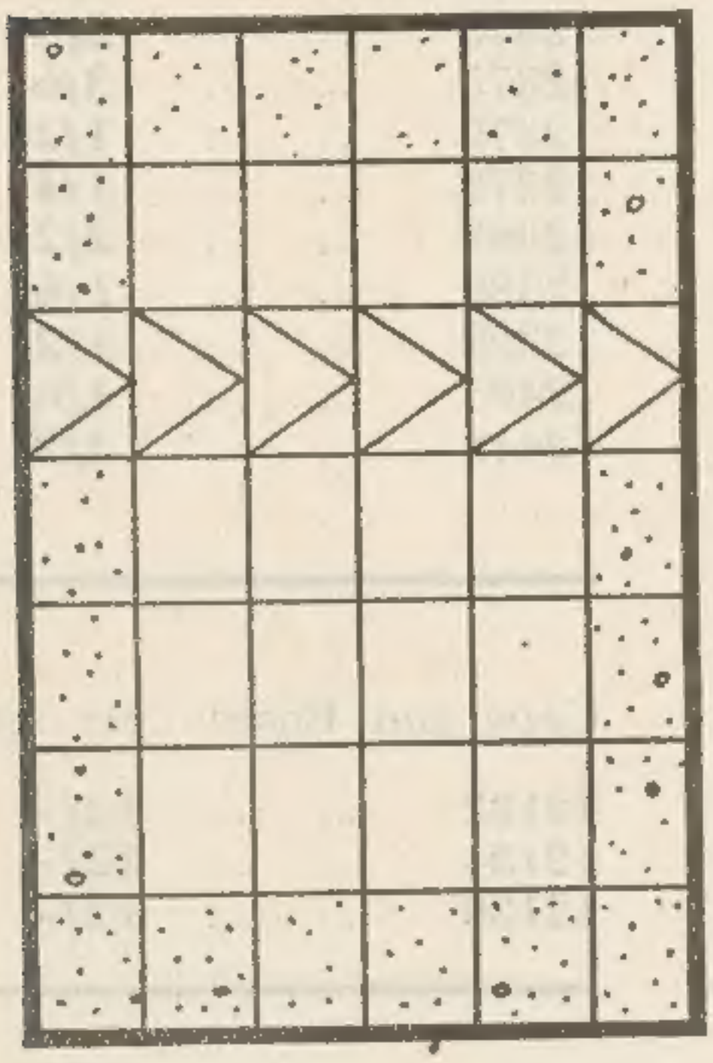
ELECTRO - COPPER GLAZING

Wunderglaze (Electro-Copper Glazing) for windows, doors, lift enclosures, top hampers, domes, ceiling lights, modern lighting fixtures, etc., is distinguished from ordinary leaded glazing by the extreme lightness, rigidity and strength of the copper framework. Any design that can be carried out in lead glazing may be executed in Wunderglaze with far greater artistic effect, for the slender cames add delicacy to the design, and furthermore, leave a larger area for the transmission of light.



Wunderglaze is impervious to the entry of air or water, and when manufactured in accordance with the Fire Underwriters' Specifications is warranted a fire-resisting material and commands the lowest insurance rates.

Fire-resisting Wunderglaze must be fabricated in panels measuring no more than 4 square feet in $\frac{1}{4}$" Glass divided up into quarries of a maximum area of 16 sq. ins.



Where Wunderglaze is required for glazing purposes only, $\frac{1}{8}$" glass is generally used and is sufficiently strong to withstand rough handling.

Send us particulars of your requirements; designs and prices submitted for any treatment at no extra cost.

Prices on Application.

DURABESTOS

(Registered Trade Name)

ASBESTOS CEMENT BUILDING SHEETS

Manufactured at Our Works, Cabarita, N.S.W.

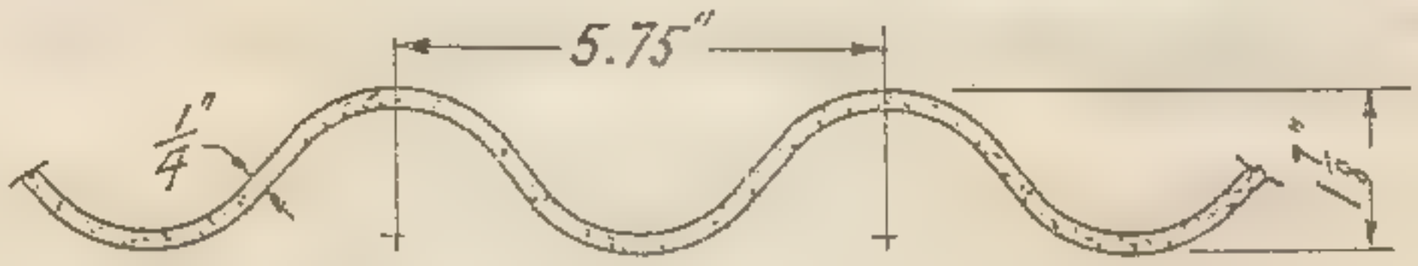
CORRUGATED DURABESTOS ROOFING SHEETS



Wunderlich Deep Corrugated Durabestos is composed of Asbestos Fibre and Portland Cement. These components properly mixed and united result in a corrugated sheet of unique physical properties, pleasing grey-white appearance and permanence. Corrugated Durabestos is strong, fire-resisting, weather-proof and generally corrosion-proof — it minimises the transmission of sound from rain, is economical in use and maintenance costs are nil.

Free of Sales Tax

All above Prices Free of Sales Tax.

DURACAST

(Registered Trade Mark)

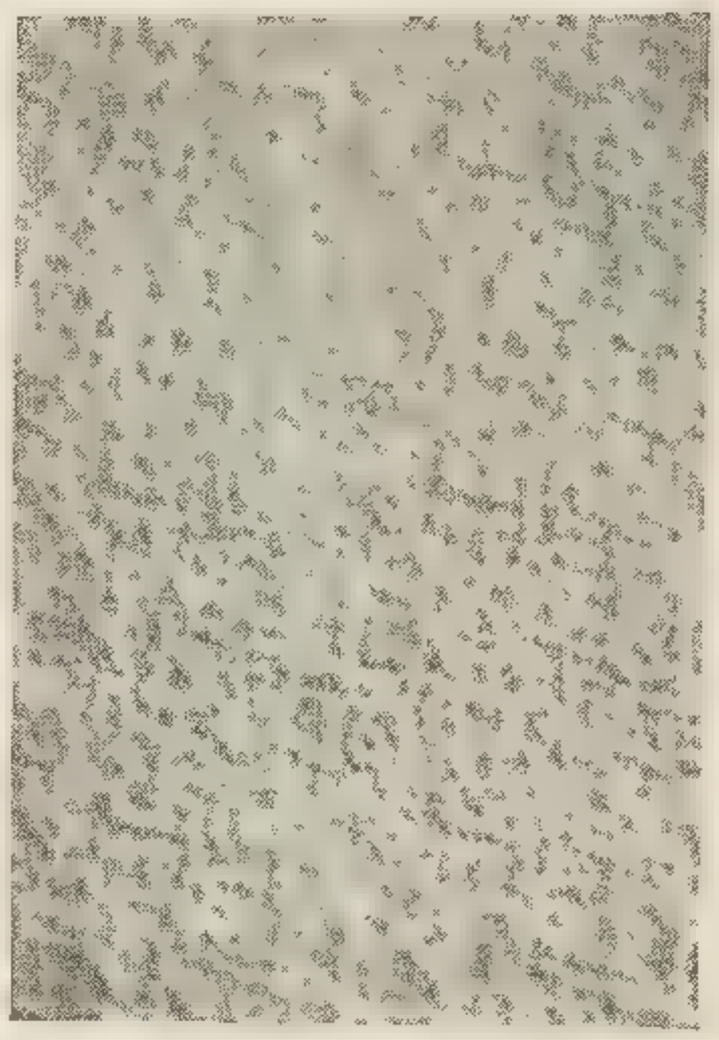
An asbestos cement sheeting available in two textures for lining the exterior walls, gables, etc., and interior walls of buildings.

Duracast (Roughcast) Texture is ideal for exteriors, whilst Duratex (Spanish Swirl) may be used for either Exteriors or Interiors to construct wood-framed Spanish Homes at low cost.

Supplied in stock sized sheets, 3′ wide by 3, 4, 6 and 8′ long by approximately $\frac{3}{16}$″ thick.

Price, **3/2** per square yard at Works.
(Free of Sales Tax).

Cartage : Extra at schedule rates. See Page 12.



DURACAST.

Packing : Where required crated for transport, a charge of **3d.** per square yard is made with a minimum of **7/6.**

Odd Sizes : Sheets other than the above stock sheets, are charged at size of sheet cut, plus a small cutting charge.

Method of Fixing Duracast and Duratex.

Duracast or Duratex is fixed in the same manner as Durabestos flat sheets. The edges of the sheets are butted against one another (not lapped). Over this butt joint, screw or nail either Durabestos Cover Battens (as illustrated on page 11), or timber cover battens. It is advisable to bed the cover battens in cement or other suitable mastic, to take up any unevenness between the cover batten and the sheet (caused by the indentations on the molded surface of the sheet).

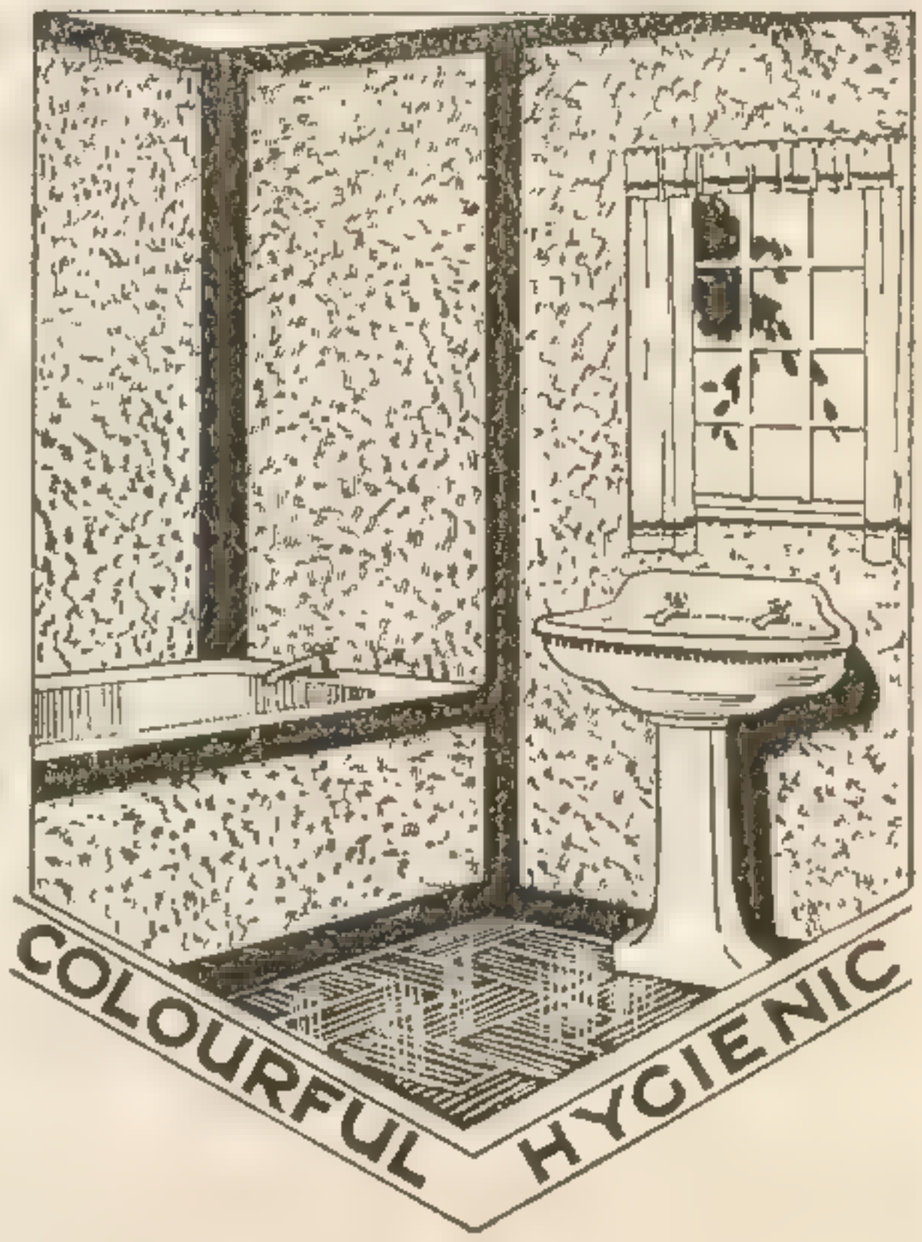
Horizontal joints are weatherproofed by the use of a galvanised drip strip. This strip extends from the back and under the upper Duracast or Duratex sheet and laps down over the lower sheet. If desired, a cover batten may also be applied.

DURATEX.

DURACHROME

(Registration Applied For)

A colourful highly glazed asbestos-cement sheet, ideal for panelling the walls of bathrooms, kitchens, hallways, shops, restaurants, office buildings and theatres, also counter fronts or for any position where a hygienic washable surface is desired. Permanent, easy to fix. Available in a range of mottled colour finishes—green, golden buff, etc., in sheets 8 x 4, 8 x 3, 6 x 4 and 6 x 3 by $\frac{3}{16}$ths inch thick (approximately).



Price, **7/9** per square yard at Works.

Cartage : Extra at schedule rates. See page 12.

Packing : Where required crated for transport a charge of **-/3** per square yard is made with a minimum of **7/6d.**

Odd Sizes : Sheets other than the above stock sheets are charged at size of sheet cut plus a small cutting charge.

DURACHROME Cover Battens and Angles, with rounded edges, similar to Durabestos sections as illustrated on Page 11, also Bevelled Skirtings, are available in Black and White finish, from stock, in lengths of 6ft. and 8ft. Can also be supplied to order in colours to match standard sheets. These exclusive accessories ensure simplicity of fixing, and prevent the accumulation of dirt.

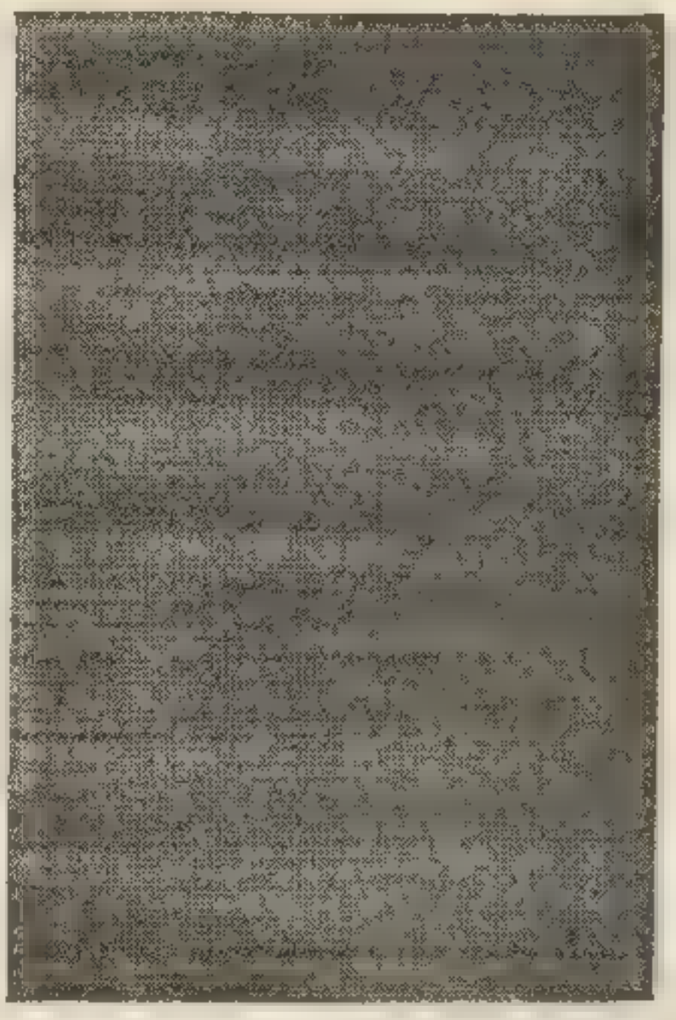
DURAVENEER

(Registered Trade Mark)

(Queensland Walnut or Maple)



An asbestos cement sheeting veneered with selected Queensland Walnut or Maple for panelling interior walls and partitions of office buildings, foyers, theatres, hallways, shops, sale rooms, show windows, banks, restaurants, homes, etc. Duraveneer combines the beauty of grained timber with the fire-resisting qualities of asbestos cement.

Available in sheets 2′ and 3′ wide, by 6′ long. The standard thickness is $\frac{9}{32}$″ (approximately).

Price : 1/1 per sq. foot **(Free of Sales Tax)** at Works.

Cartage : Extra at schedule rates. See Page 12.

Packing : Where required crated for despatch, a charge of **3d.** per sq. yd. is made with a minimum of **7/6.**

Odd Sizes : Sheets other than the above stock sizes are charged at size of sheets cut, plus a small cutting charge.

INSULABESTOS

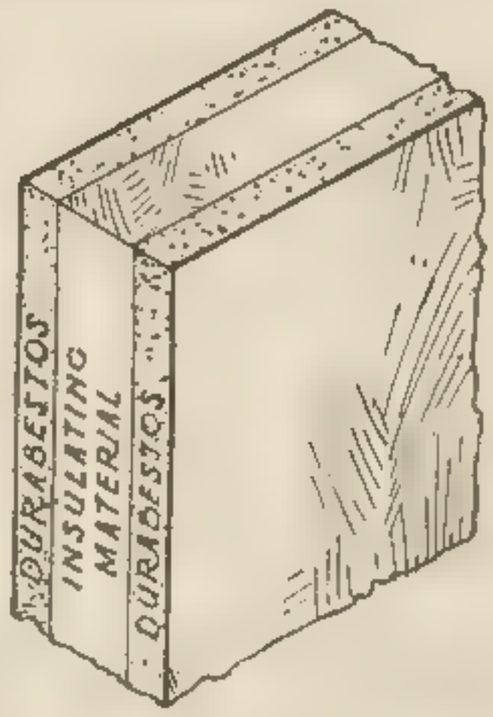
(Registered Trade Mark)

For fire and vermin proof and sound insulating partitions, walls, doors, etc. INSULABESTOS is a double-faced asbestos cement sheeting (faced on each side with $\frac{5}{32}$″ thick Durabestos), with a core of highly efficient insulating fibre. This sheeting possesses all the qualities of asbestos cement and in addition is an effective insulator. Available in sheets 3′ and 4′ wide, by 3, 4, 6, 7 and 8′ long.

The standard thickness is $\frac{3}{4}$″ (approximately).

Price : 1/1 per square foot (free of Sales Tax).

Packing and Cartage : Extra—same basis as Durabestos. See page 12.



Section Through Insulabestos Sheet.

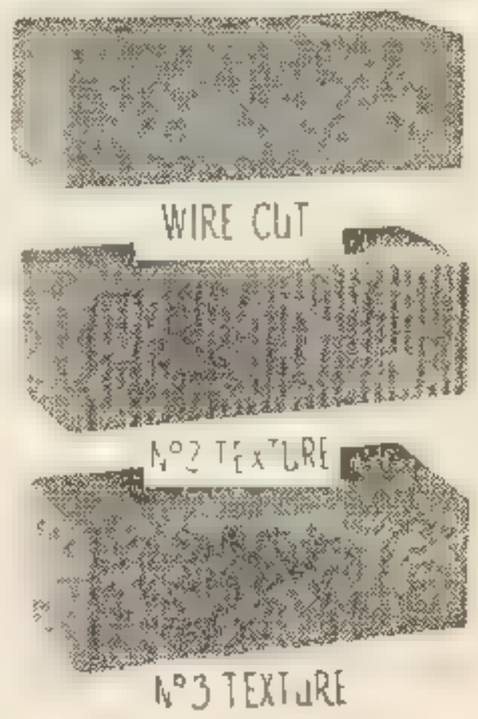
ASBESTOS MILLBOARD

Asbestos Millboard is suitable for industrial insulating purposes, also for acoustical installations to theatres, picture shows, etc., where fire-resisting treatments to walls, floors, ceilings, etc., are necessary. Available in sheets 3′ and 4′ wide by 3, 4, 6 and 8′ long, also 40″ x 40″ square.
Standard thicknesses are $\frac{1}{16}$″, $\frac{1}{8}$″ and $\frac{1}{4}$″ approximately.

	$\frac{1}{16}$″	$\frac{1}{8}$″	$\frac{1}{4}$″
Weight per square foot	5-oz.	8-oz.	16-oz.
Price per square foot	**1¾d.**	**2¾d.**	**4¾d.**

Packing and Cartage extra. Same basis as " Durabestos." **Free of Sales Tax.**

COLORTEX BRICKS



Wunderlich Face Bricks with a variety of crimped, rug-faced and wire cut textures. Available in a range of individual and blended colours, comprising Red, Brown, Yellow, Buff, Purple, Blue, etc., either matt surfaced or glazed.
Sizes: 9″ x 4½″ x 3″, and 9″ x 4½″ x 2″.

Price on application.

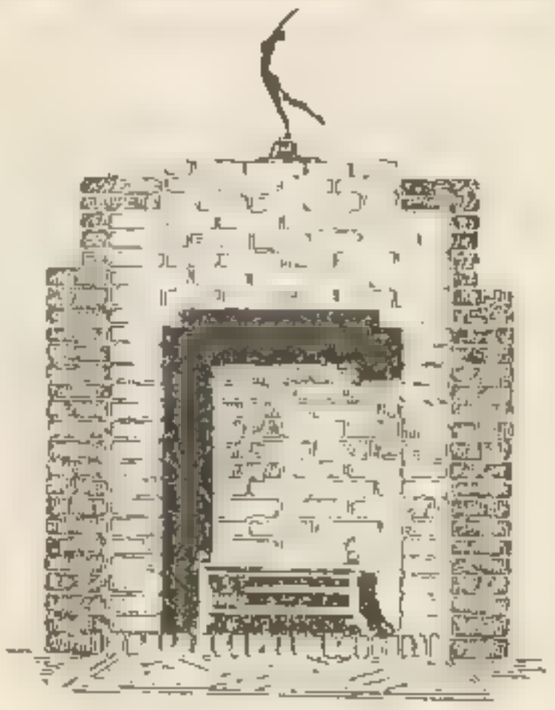
Special Molded Bricks for base and string courses, architraves, door jambs, etc.

Price on application.

APPLICATION—

Joints.—Colortex bricks can be laid with either flush, struck or raked joints; artistic effects are obtained by using coloured mortar joints.
Coloured Mortars. Can be obtained mixed ready-for-use in standard colours of White, Cream, Red, Black and Green. These colours are guaranteed by the makers to be fadeless.
Laying.—Different types of joints effect somewhat the method of laying; however, no matter what type of joint is selected, attention is drawn to the fact that mortars should not come in contact with the face of Textured Brickwork as coloured mortars, especially Black, have a tendency to stain the surface.
Washing Down Finished Work.—It will be found necessary to wash down with a mixture of Hydrochloric Acid and water (one part acid to ten parts water). After applying, it is also necessary to thoroughly wash any remaining acid solution (whilst still wet) from the face of the brickwork with clean water, as this final washing prevents white scumming that sometimes occurs on badly washed down work.

BRICKETTES



Wunderlich Colortex Brickettes are small, wire cut bricks specially made for fireplace construction. Full glazed, flashed, and unglazed brickettes are available in ordinary clay. Colours include Red, Brown, Chocolate, Yellow, Purple, Buff and a variety of blended Autumn colours. Fireclay Brickettes are made in Colours ranging from yellow to smoky brown.

Size, 6½″ x 1¼″ x 3″. Price on application.

Free of Sales Tax.

COLORTEX BRICKS

Standard Specials as illustrated below, offer unlimited scope in the design of Ornamental Brickwork Features and obviate to a great extent the use of cut bricks. They are available in No. 3 Texture., Order by their distinguishing numbers.

ENAMELLED FACE BRICKS

Few materials lend themselves so effectively to the modern trend in design as does "**Wunderlich**" **Enamelled Face Brick.** Its colour, variety of texture and structural strength all commend it. Available in a range of standard colours, finished either smooth glazed or matt textured, the surface of the brick will not collect or absorb dirt or grime, or scale or discolor even under the severest climatic conditions.

Applications include complete facings or as a trim or decoration to spandrels, piers and band courses of office or civic buildings, stores, theatres, etc., also linings to corridors, restaurants, shop and shop fronts, bakeries, power stations, light wells and to indoor and outdoor swimming pools.

For floodlighting or night architecture they offer amazing possibilities.

Wunderlich Enamelled Face Bricks are available in standard sizes of 9″ x 4½″ x 3″ glazed on the stretcher or header faces and, if required, on the 9″ x 4½″ face. Standard specials in the form of Bull nose, etc., are also available.

Prices on Application.

Glazed Square Hole Airbricks, 9″ x 3″ (all Colours) 3/9 each.

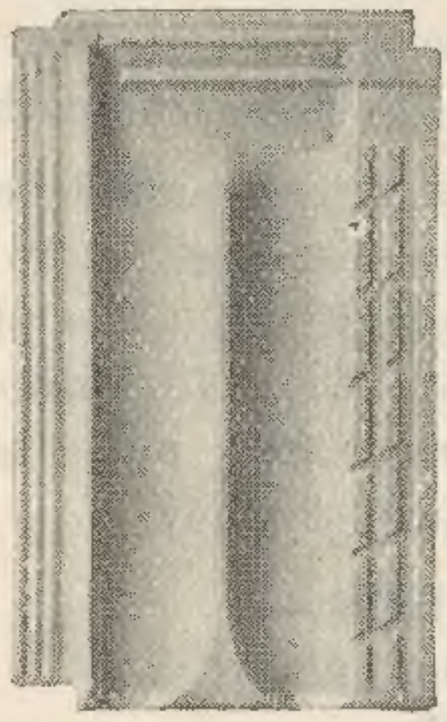
ROOFING TILES



Wunderlich Marseilles (French) pattern Roofing Tiles are available in a wide range of colours from shades of Red, Brown, Chocolate, Buff, Green, Blue, Golden Brown, in Mottled and Fire Flashed, semi-glazed and full glazed effects. They are to a marked degree resistant to the onslaughts of time and weather.

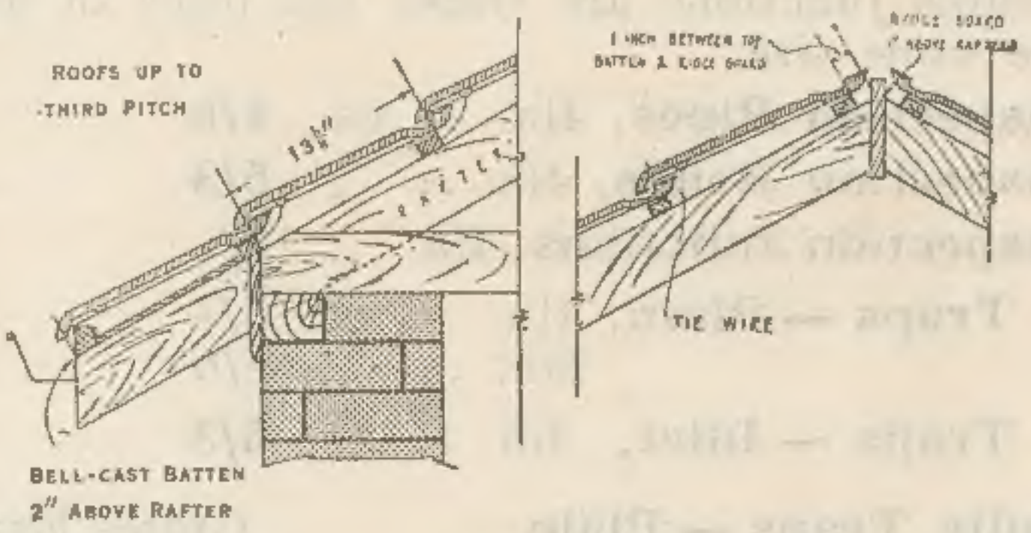
Shingle, both plain and weathered, and Mission Tiles, also manufactured in a full range of colours.

Quotations given for supply and fix, in any part of the State.

RAFTER MEASUREMENTS (Marseilles Tiles) —

To avoid cut tiles, set out rafters to the correct lengths given below. Work to these measurements to ensure a course of full tiles at eaves and ridge.

No. of Courses	Length of Rafter	No. of Courses	Length of Rafter
2.....	2ft. 4⅜in.	14.....15ft. 11⅞in.	
3.....	3ft. 6in.	15.....17ft. 1½in.	
4.....	4ft. 7⅝in.	16.....18ft. 3⅛in.	
5.....	5ft. 9¼in.	17.....19ft. 4¾in.	
6.....	6ft. 10⅞in.	18.....20ft. 6⅜in.	
7.....	8ft. 0½in.	19.....21ft. 8in.	
8.....	9ft. 2⅛in.	20.....22ft. 9⅝in.	
9.....10ft. 3¾in.		21.....23ft. 11¼in.	
10.....11ft. 5⅜in.		22.....25ft. 0⅞in.	
11.....12ft. 7in.		23.....26ft. 2½in.	
12.....13ft. 8⅝in.		24.....27ft. 4⅛in.	
13.....14ft. 10¼in.			



Ridge Board should project one inch above Rafters. Hip Board should be flush with top of Common Rafters. Where a facia board is used, deduct its thickness from the lengths of rafters given above.

Pattern	Average Number of Tiles to Square of Roofing.	Weight of Tiles Per Square.	Battens to Square of Roofing.
Marseilles (French)	130	1,007 lbs.	90ft. 1½" x 1"
Mission (small	288	1,512 lbs.	160ft. 2¾" x 1" (sarked)
Shingle	560	1,260 lbs.	300ft. 1" x 1"
,, Rusticated	560	1,400 lbs.	300ft. 1" x 1"

ACCESSORIES.—Standard Ridge Capping (19" long, cover 16¾"), apex splays, finials, etc., available to suit all Tiles.
